

Chapter 9 Free-Response Review Exercises

Directions: These review exercises are free-response questions based on the content in Chapter 9: Parametric Equations and Polar Coordinates.

- 9.1: Parametric Equations
- 9.2: Differentiating and Integrating Parametric Functions
- 9.3: Polar Coordinates and Functions
- 9.4: Differentiating Polar Functions
- 9.5: Areas with Polar Curves
- 9.6: Additional Calculus with Parametric and Polar

For each question, show all your work. To make the best use of these review exercises, follow these guidelines:

- Print out this document and work through the questions as if this paper were an exam.
- Do not use a calculator of any kind. All of these problems are designed to contain simple numbers.
- Adhere to the time limit.
- After you complete all the questions, score yourself according to the Solutions document. Note any topics that require revision.
